

Denise Stewart:
Science Teacher Middle & High School

Welcome to Denise Stewart, Destiny's new high school and middle school science/health teacher. When asked about her decision to become a teacher, Denise replied "One unique quality that I possess is my ability to connect well with people regardless of age, gender or ethnicity.

I believe that my ability to connect well with others came from the way I was raised, my teachers and my relationship with Jesus Christ. Teaching is a wonderful opportunity for me to inspire young people to pursue their education, encourage them in their relationship with Christ, and to be excited about Health and Science."

Professionally, Ms. Stewart is a graduate of Clarkson University with a Bachelor of Science in Biology, and Master of Science in Biomedical Sciences from the Philadelphia College of Osteopathic Medicine. Over the past eight years, she has been employed as a laboratory technician at the Albert Einstein College of Medicine (Bronx, NY), the University of Rochester Medical Center, and most recently as research associate at ACM Medical Laboratory. Her academic interests include biological sciences and health and prevention medicine.

Ms. Stewart's hobbies include watching movies, doing arts and crafts and socializing with friends. She is excited to be a part of the staff at Destiny Christian School and looks forward fun-filled, successful school year interacting with staff, parents and teaching/learning with students.
